Day Care, OSHC, Vacation Care & K-PP Archaeology Incursions

archae-aus

Tailored incursions to suit children from ages 3 - 12

Develop your students' understanding of archaeology and history with Archae-aus's unique hands-on archaeology incursions tailored for vacation care, after school care, day care, kindergarten and pre-primary.

We introduce young children to Australian archaeology. Our sessions focus on interactive teamwork exercises, that encourage children to cooperate and use their social, problem solving and analytical skills.

Children will have fun learning about archaeology by digging up artefacts from their own excavation box. They will find interesting objects that were once used in Australia's colonial period and ancient past. These objects help to tell a story about what people were doing in the past and who might have used them.

In addition to excavation, we have other activities that reflect some of the other work that archaeologists do. For example, we do artefact drawing/tracing and colouring-in and artefact reconstruction, as well as interpretative activities in the form of story-telling, show and tell and 'joining the dots'.

KEY LEARNING OBJECTIVES

Recognise Australian Aboriginal and Historical cultural material

Recognise how archaeologists discover and analyse evidence of past societies and cultures

Recognise that archaeological evidence can tell a story about the past

Development of teamwork skills

Development of analytical and motor skills

In this workshop, children will have the opportunity to:

- *Handle authentic historical and Aboriginal artefacts*

- *Dig for evidence like an archaeologist*

- *Piece together fragments of a broken artefact*

- *Participate in an archaeological narrative*
